Education

Jaypee University of Engineering and Technology

Bachelor of Technology (B.Tech)

CGPA: 7.0

2023 – 2027

Guna, Madhya Pradesh

St. Mary's Convent School

Class XII (ISC)

Percentage: 90%

2021 – 2022

Agra, Uttar Pradesh

St. Mary's Convent School

Class X (ICSE)

Percentage: 94%

2019 – 2020

Agra, Uttar Pradesh

Technical Skills

Languages: Java, Python, C++, C, JavaScript

Data Structures & Algorithms: Solved 250+ DSA problems on coding platforms

Frontend: React (Vite), Tailwind CSS, HTML, CSS

Backend: Spring Boot, Spring Cloud, REST APIs

Databases: MongoDB, PostgreSQL, SQL, Redis

Web Concepts: Client-Server Architecture, Microservices, Caching Strategies

Deployment: Docker, Render

Version Control: Git, GitHub

Core CS: OOPs, DBMS, Operating Systems, Computer Networks

Tools: Postman, VS Code, Linux

Projects

Frontend Portfolio Website

Live GitHub

React, Vite, JavaScript (JSX), Tailwind CSS, HTML, CSS

- Built a responsive personal portfolio to showcase projects and skills using React and Vite.
- Designed reusable UI components with Tailwind CSS for a clean and consistent interface.
- Integrated Web3Forms API for contact form submission without backend.
- Optimized performance using Vite build system and modular architecture.

Fitness Microservices App

GitHub

Java, Spring Boot, Spring Cloud, React, MongoDB, Keycloak, RabbitMQ, Docker

- Built an AI-powered fitness tracking system using microservices architecture with API Gateway, Eureka, and Config Server.
- Designed event-driven communication using RabbitMQ for scalable inter-service messaging.
- Implemented secure authentication using Keycloak with OAuth2 and JWT-based authorization.
- Integrated Google Gemini API to generate personalized fitness recommendations from user data.

Journal Management System

GitHub

Java, Spring Boot, Spring Security, MongoDB, Redis, REST APIs

- Developed a secure multi-user journal system with JWT authentication and OAuth2 (Google Login).
- Implemented Redis-based caching layer using cache-aside pattern to store frequently accessed journal entries and reduce database load.
- Improved API response time by minimizing repeated database queries through intelligent cache utilization.
- Designed REST APIs supporting full CRUD operations with role-based access control.
- Implemented scheduler-based email notifications and integrated external APIs for enhanced insights.
- Deployed application on Render with API documentation using Swagger.

Achievements

- Completed Software Engineering Job Simulation by JPMorgan Chase & Co. via Forage.
- Completed AI Fundamentals Certification by IBM.
- Earned Docker Foundations Professional Certificate via LinkedIn Learning.
- Completed Microsoft Azure AI Essentials Professional Certificate.
- Solved 250+ coding problems across platforms (ongoing).
